Figure 1 is a line graph showing the percentage of total catch versus the number of hauls for three species: *P. setiferus*, *P. setiferus* + *P. setiferus* + *P. setiferus*, and *P. setiferus* + *P. setiferus* + *P. setiferus*. The x-axis represents the number of hauls (1 to 10), and the y-axis represents the percentage of total catch (0 to 100). The graph shows that the percentage of total catch increases with the number of hauls for all three species, with *P. setiferus* + *P. setiferus* + *P. setiferus* showing the highest percentage of total catch.

Confession by iPhone? No way, says Vatican

The Vatican has stated that a confession made via an iPhone is not valid. The statement was made in response to reports that a priest had accepted a confession from a man who was using a mobile phone to communicate. The Vatican emphasized that the sacrament of confession requires a direct and personal encounter between the penitent and the priest.

The Vatican's position is based on the traditional understanding of the sacrament of confession, which requires a direct and personal encounter between the penitent and the priest. The use of a mobile phone to communicate is seen as a barrier to the sacrament, as it prevents the priest from seeing the penitent and assessing their state of mind.

The Vatican's statement is a clear rejection of the idea that a confession made via a mobile phone is valid. It is a reminder that the sacrament of confession is a sacred and personal act that requires a direct and personal encounter between the penitent and the priest.

Gov't debt hit P4.79T as of Nov.

Leper contract extended

Leper contract extended

The government has extended the contract for the construction of the Leper Hospital, which was originally scheduled to be completed by the end of 2010. The extension is due to the complexity of the project and the need for additional resources.

The government has also announced that it will be increasing the budget for the health sector in the coming year. This is part of a broader strategy to improve the quality of healthcare services and to address the needs of the population.

Gov't debt hit P4.79T as of Nov.

The government's debt has reached a record high of P4.79 trillion as of November. This is due to a combination of factors, including the need to finance infrastructure projects and the impact of the global financial crisis. The government is working to manage the debt and to ensure that it remains sustainable.

"When we engaged in the early stages of the program, we were very much aware of the fact that the program was heavily dependent on the support of the state," says a senior official. "We are now in a position where we are able to run the program on a self-sustaining basis." The program is now a self-sustaining enterprise, and the state is no longer a major contributor.

Mizuno wins big as Azkals' popularity grows

Philippine Football Federation extends deal with Japanese firm

The Philippine Football Federation (PFF) has extended its partnership with Mizuno, the Japanese sports equipment manufacturer, for another two years.

The PFF announced the extension of its partnership with Mizuno, which has been the official kit provider for the Philippine national football team, the Azkals, since 2007. The deal, which was originally set to expire in 2012, has now been extended until 2014. Mizuno is a leading Japanese sports equipment manufacturer, known for its production of athletic shoes, socks, and other sports-related products. The PFF is the governing body for football in the Philippines and is responsible for the development and promotion of the sport in the country.

The PFF is a member of the Asian Football Confederation (AFC) and the FIFA Confederation of Southeast Asian Football (CSEAFA). It is also a member of the Philippine Sports Commission (PSC), which is the national sports governing body. The PFF is currently working to improve the infrastructure of football in the Philippines, including the development of new football fields and the training of coaches and players. The PFF is also working to promote football in the Philippines, including through the organization of football tournaments and the promotion of football in schools and communities.

Dialogue—not monologue—with consumers

By Roger Phillips

Businesses are often tempted to see consumers as a monolith, a single entity that can be reached through a single message. But in reality, consumers are a diverse group of individuals with different needs, wants, and expectations. To effectively reach and serve these consumers, businesses must engage in a dialogue, not a monologue. This means listening to what consumers have to say and responding to their needs and concerns. It also means being transparent and honest about a company's products and services. By engaging in a dialogue with consumers, businesses can build trust and loyalty, and ultimately, achieve long-term success.
